Welcome

CONGRATULATIONS on purchasing a Track Bar Rebuild Kit from JKS Manufacturing. We are committed to providing you with the best products available and your satisfaction is our first priority.

PLEASE READ these Installation Instructions carefully, and save them for future reference, as they contain important installation and maintenance information.

Tools Required

- H Frame Press
- Internal Snap Ring Pliers

Parts

Description	QTY
Misalignment Spacer	2
7/8" COM Bearing	1
Retaining Ring	1
OE Rubber Bushing	1
Track Bar Decal	1

Installation

□ TRACK BAR REMOVAL

- Securely block wheels to prevent accidental movement of vehicle.
- Remove track bar from vehicle. Original installation instructions can be referenced if necessary.

□ COM BEARING

□ 1. REMOVAL

- Remove the misalignment spacers from the COM bearing.
- Using internal snap ring pliers, remove the snap ring that is retaining the COM bearing.
- Using a H Frame press and appropriate press tooling or an appropriately sized socket, press out the old COM bearing.
- Align the press plates such that the bearing has somewhere to go when being pressed out.

□ 2. INSTALLATION

- Align the track bar eye and new COM bearing.
- Using appropriate press tooling or socket press in the new bearing.
- Ensure that the bearing is fully seated so that the snap ring can be installed.

Make sure the snap ring groove is not damaged before proceeding

- Using internal snap ring pliers, install the new snap ring. Verify that it is fully seated.
- Install the new misalignment spacers.

□ RUBBER BUSHING

□ 1. REMOVAL

- Position press plates so that the rubber bushing eye is fully supported.

- Using a large socket or other appropriate tooling, press the old bushing out of the bushing eye. The socket used should be as large as possible while still fitting through the bushing eye.
- Clean any corrosion or debris from the inner surface.

□ **2. INSTALLATION**

- Place the new bushing and control arm eye into the press. Ensure the two components are aligned.
- Using appropriate tooling, press the bushing into place until the lip of the bushing is flush with the bushing eye.
-

□ **FINAL STEPS**

- Reinstall track bar. Reference original installation instructions if necessary.
- Verify jam nut is tight and did not move.
- If needed, a replacement decal is included.

Maintenance

Check torque specifications regularly.
